# PROFESSIONAL POWER BOX

**PERFECT, USER-FRIENDLY POWERING SYSTEM – HIGH MOBILITY AND EFFORTLESS OPERATION AT ANYTIME, ANYPLACE!**

An indoor and outdoor powering system, the PowerBox produces portable power for electronic appliances with back up from a rechargeable 100 Amp Brillhaus AGM Battery. Assembles with light trolley and an adjustable waist level handle, the PowerBox is a real mobile emergency powering system.

The concept of battery/inverter combination design effectively overcomes the potential hazard which exists during connecting individual battery and inverter units. Together with its sophisticated built-in protection functions, the PowerBox is the ideal mobile power system with synchronised DC / AC Transformer technology and highest operation safety. The user can handily obtain by just plugging in the appliance to the PowerBox AC Socket.

Characteristics:

Product Code: CV-10C10: 2 AC Receptables, 1000W Inverter, built in 5 Amp Charge Rate

Product Code: PK-10C10: 1 AC Receptable, 1000W Inverter, external charger.

# YOUR SOLAR POWERING SYSTEM

**WITH MOBILE LIVING ATTITUDE! SIMPLE - POWERFUL - RELIABLE - COMPATIBLE**

Features:

- Includes a PowerBox, Charge Controller and Photovoltaic Module
- Self Rechargeable by connection
- Zero pollution, environmentally friendly
- High AC power output with long operating duration
- Specifically designed for places which is totally out of shore power

# PROFESSIONAL CHARGE CONTROLLER FOR SOLAR SYSTEMS

Not like other charge controllers which you can get from the market, the **i-Sokrit™ SCC - 407, 415 & SCC - 421** is solely a **7, 15 & 21 Amp** Current Regulator specially designed for your daily use with photovoltaic modules which provide reliable overcharge protection for larger solar systems up to **105, 225 & 315 watts** respectively.

It was typically integrated with our perfect design of **ERBCS™** for the regulation of both **GEL Cell** and **AGM Lead Acid 12V** batteries.

With the micro-processing digital configuration on the relevant unique circuitry, it provides a pulse type charging modulation that reduces battery gassing and fluid loss and also allows photovoltaic modules to fully charge a dead battery.

Through its attractive mouse-like mechanism, it allows for flush mounting on any wall for a distinctive finish. The **i-Sokrit™ SCC Series** is your right choice of the ideal charge controller for use with RV, marine or residential solar systems.

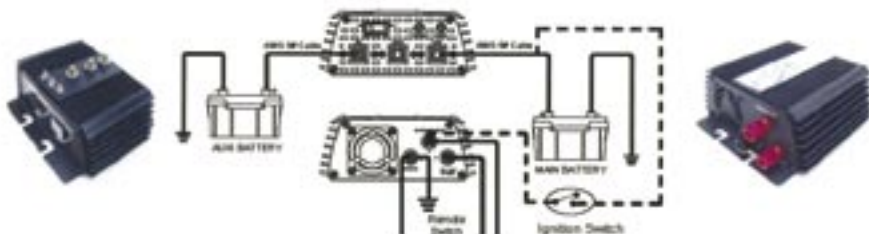

## ISOLATOR - HEAVY DUTY FOR DUAL BATTERY SYSTEMS

**HEAVY DUTY AND VOLTAGE DROP FREE!**

A perfect battery isolator should be performed well in two important fields: firstly to provide a reliable and efficient method of both charging and isolating dual batteries, secondly if the main battery's voltage falls below 9.0V for 1/2 second and the auxiliary battery is above 9.0 volts, both batteries are connected to provide a powerful boost starting.

# POWER INVERTERS - DC TO AC

## PORTABLE AND COMPLETE POWER SOLUTION UP TO 3000W OF CONTINUOUS POWER

### DC-AC Power Inverter Series

To be a Professional Manufacturer of Power Inverters, we have designed the most suitable and user friendly devices.

## I-CHARGE VERTER - INVERTER, CHARGER COMBO SYSTEM

The i-Charge Verter acts as a charger, an inverter and an off-line UPS at the same time. TranSwit Technology will ensure your applications are operating continuously while going out of household power supply.

## INVERTER - DUO POWER

- Transwit Technology for AC / DC fully automatic input selection
- Short switching time from between AC & DC power input
- Self-detecting battery voltage

## INVERTER - BV-SERIES

BV Series Inverters supply power by generating 115V / 230V AC from any 12 & 24V DC power sources for the operations of electrical devices.

# STATE OF THE ART PROFESSIONAL CHARGERS

## STATE OF THE ART TECHNOLOGY

Best performance for 12/24 VDC Lead Acid & Gel Batteries Regulated with excellent protective functions

## CAR CHARGER LEAD ACID BATTERY
